"We are proud to share these preliminary results from First Watch's fourth quarter. "Our continued strong performance is possible because of the dedication of our operations teams throughout the country, whose resilience and gracious service are reflected in these results."

Updated Outlook:

Based upon the preliminary same-restaurant sales growth noted above and considering certain end-of-year expenses, management expects Adjusted EBITDA*** to be slightly above the high-end of the previously announced Adjusted EBITDA range of \$10.2 million to \$11.2 million for the fourth quarter.

*** We have not reconciled guidance for Adjusted EBITDA to the corresponding GAAP financial measure because we do not provide guidance for the various reconciling items. We are unable to provide guidance for these reconciling items because we cannot determine their probable significance, as certain items are outside of our control and cannot be reasonably predicted due to the fact that these items could vary significantly from period to period. Accordingly, reconciliations to the corresponding GAAP financial measure are not available without unreasonable effort.

Upcoming Conference Participation:

As previously announced, Chris Tomasso, Chief Executive Officer and President, and Mel Hope, Chief Financial Officer, will host a fireside chat at the 24th Annual ICR Conference today at 3:30 p.m. Eastern Time. Definitions:

The following definitions apply to these terms as used in this release:

Adjusted EBITDA: a non-GAAP financial measure, is defined as net income (loss) before depreciation and amortization, interest expense, income taxes and items that the Company does not consider in the evaluation of its ongoing core operating performance. Adjusted EBITDA as shown is not

adjusted to reflect the impact of pre-opening expenses or deferred rent (income) expense.

Same-restaurant sales growth: the percentage change in year-over-year restaurant sales (excluding gift card breakage) for the comparable restaurant base, which is defined as the number of company-owned First Watch branded restaurants open for 18 months or longer as of the beginning of the fiscal year ("Comparable Restaurant Base"). For the thirteen weeks ended December 26, 2021 there were 269 restaurants in the one-year Comparable Restaurant Base and 210 restaurants in the two-year Comparable Restaurant Base. We gather daily sales data and regularly analyze the customer traffic counts and the mix of menu items sold to aid in developing menu pricing, product offerings and promotional strategies designed to produce sustainable same-restaurant sales growth.

Same-restaurant traffic growth: the percentage change in traffic counts as compared to the same period in the prior year using the Comparable Restaurant Base. For the thirteen weeks ended December 26, 2021 there were 269 restaurants in the one-year Comparable Restaurant Base and 210 restaurants in the two-year Comparable Restaurant Base. We gather daily traffic data and regularly analyze customer traffic to aid in developing menu pricing, product offerings and promotional strategies.

System-wide restaurants: the total number of restaurants, including all company-owned and franchise- owned restaurants.

Non-GAAP Financial Measures:

To supplement the consolidated financial statements, which are prepared and presented in accordance with U.S. generally accepted accounting principles ("GAAP"), the Company uses Adjusted EBITDA (a "non-GAAP financial measure"). This non-GAAP financial measure is not a measurement of the Company's financial performance under GAAP and should not be considered as an alternative to net income (loss), income (loss) from operations, or any other performance measures derived in accordance with GAAP, or as an alternative to cash flow from operating activities as a measure of our liquidity. This non-GAAP financial measure may differ from similarly titled measures used by other companies due to different methods of calculation.

Adjusted EBITDA: Management uses Adjusted EBITDA (i) as a factor in evaluating management's performance when determining incentive compensation, (ii) to evaluate the Company's operating results and the effectiveness of our business strategies (iii) internally as benchmarks to compare the Company's performance to that of its competitors and (iv) to provide investors with additional transparency of the Company's operations. The use of Adjusted EBITDA as a performance measure permits a comparative assessment of the Company's operating performance relative to the Company's performance based on the Company's GAAP results, while isolating the effects of some items that are either nonrecurring in nature or vary from period to period without any correlation to the Company's ongoing core operating performance.
